

WOTS Request form

To open a WOTS request, please fill in the form with your information. When complete, email to the WOTS program manager who will review the information and determine if WOTS can provide the appropriate support. Then, if the request is accepted, the program manager will identify a scientist or engineer (or contact the scientist/engineer requested on your form) from ERDC who will contact you shortly. WOTS will fund a maximum of 40 hours of the scientist's or engineer's labor and travel to help meet the request needs. If after the 40 hours are expended and support is still needed, then a reimbursable project or MIPR funded by the District or Division will be necessary to continue. WOTS response products have included ERDC technical notes, guidance documents, webinars, training, conference calls, technology demonstrations, site visits, and conference presentations. The level of support and response products are unique to each request.

Save this form to your local machine, complete and email to: **WOTS@usace.army.mil**

Subject line: **WOTS Request**

First name:*

Last name:*

Select District/Division:*

E-mail address:*

Explain the request:*
